AI Model Providers and Their Recent Models

10 providers, 21 models released between November 2025 and November 2026

Research date: 11 November 2026. Prices: USD per 1 million tokens (input / output), standard API tier.

1. Model comparison

Model Provider	Model	Release Date	Cut off Date	Cost of tokens (USD per 1M, input / output)	Context Window	Type	When to use this model
Anthropic	**Claude Fable 5.2**	Nov 9, 2026	Jun 2026	**$8 / $40** Fast mode: $16 / $80	1M tokens (128K max output)	Proprietary. Top (Mythos-class) reasoning model. Text and image in, text out.	The hardest, longest-running technical work: large refactors, deep research and complex agent tasks where quality matters more than cost.
Anthropic	**Claude Opus 5.5**	Sep 22, 2026	Jun 2026	**$4 / $20** Batch: 50% off	1M tokens (128K max output)	Proprietary flagship. Adaptive reasoning (always on). Text and image in.	Long-running agentic coding and knowledge work that needs strong judgment, at about half the price of Fable.
Anthropic	**Claude Sonnet 5.5**	Sep 28, 2026	Jun 2026	**$2 / $10**	1M tokens (128K max output)	Proprietary mid-tier. Adaptive reasoning. Text and image in.	Everyday coding (bug fixes, features), document work and production assistants that need a balance of speed, cost and quality.
Anthropic	**Claude Haiku 5.5**	Oct 7, 2026	Jun 2026	**$0.10 / $0.50 (prompts up to 100K tokens)** $0.50 / $2.50 (above 100K)	1M tokens (128K max output)	Proprietary small model. Fastest Claude model.	High-volume, cost-sensitive work: summaries, classification, sub-agents, live customer support and browser use.
OpenAI	**GPT-6 Astra**	Sep 3, 2026	Apr 30, 2026	**$10 / $50** Cached input: $1 Higher rate above 272K-token prompts	1.05M tokens (922K max input, 128K max output)	Proprietary flagship reasoning model. Text and image in. Computer use.	The most demanding coding, research, science and computer-use tasks. Good as an escalation model when cheaper tiers fail.
OpenAI	**GPT-6.1 Sol**	Sep 29, 2026	Apr 30, 2026	**$2 / $10** Cached input: $0.10 2x input, 1.5x output above 272K	1.05M tokens (922K max input, 128K max output)	Proprietary balanced reasoning model. Text and image in.	Near-Astra quality for complex coding, computer use and professional work at one fifth of Astra's price.
OpenAI	**GPT-6.1 Terra**	Oct 26, 2026	Jun 1, 2026	**$1 / $5** Cached input: $0.05	1.05M tokens (128K max output)	Proprietary fast mid-size model. Text and image in.	Fast visual reasoning, precise computer use (for example form filling and data entry) and clear writing for high-volume business automation.
OpenAI	**GPT-6 Luna**	Sep 22, 2026	May 18, 2026	**$0.10 / $0.50** $0.20 / $0.75 above 272K	1.05M tokens (922K max input, 128K max output)	Proprietary small, most efficient GPT-6 model.	Focused high-volume tasks such as extraction, summarisation, routing and simple chat.
Google	**Gemini 4 Argon**	Announced Sep 30, 2026 (limited). API GA Oct 13, 2026	Not published	**Intro: $2 / $10 (until Nov 30, 2026)** From Dec 1, 2026: $4 / $20 Cached input: 95% off	1,048,576 input tokens. Output up to 1M tokens	Proprietary frontier reasoning model.	Long-horizon software engineering, large code migrations, legal and finance knowledge work, cyber defence, and tasks that need very long outputs.

Model Provider	Model	Release Date	Cut off Date	Cost of tokens (USD per 1M, input / output)	Context Window	Type	When to use this model
Google	**Gemini 3.6 Flash**	Jul 21, 2026	Mar 2026	**$1.50 / $7.50**	1,048,576 tokens (65,536 max output)	Proprietary fast multimodal model. Text, image, video, audio and PDF in.	Google's default workhorse: coding, knowledge work and multimodal inputs (video, audio, PDF) at moderate cost.
Google	**Gemini 3.5 Flash-Lite**	Jul 21, 2026	Mar 2026	**$0.30 / $2.50**	1,048,576 tokens (65,536 max output)	Proprietary lightweight, low-latency model.	High-throughput agentic search, document processing and classification on a tight budget.
xAI (SpaceXAI)	**Grok 4.7**	Sep 21, 2026	May 2026	**$2 / $6** Cached input: $0.50 Rates double above 200K-token prompts	500K tokens	Proprietary reasoning model (reasoning always on). Text and image in.	Coding and knowledge work, especially when you want built-in web and X (Twitter) search for real-time and social data.
Meta	**Muse Spark 1.3**	Sep 2, 2026	Not published	**$1.25 / $4.25** Contributor tier: about $0.10 / $0.20 (Meta may train on your data)	1,048,576 tokens	Proprietary multimodal reasoning model. Text, image and video in.	Low-cost agentic coding (Muse Code) and long-context retrieval through the Meta Model API.
Meta	**Muse Spark Open**	Oct 15, 2026	Not published	**Free weights (Muse Model License)** Hosted price varies by provider	1M tokens	Open-weight MoE (816B total, 42B active). Text, image, video and audio in.	Teams that want a US open-weight model to self-host or fine-tune for coding agents and long tasks, with full data control.
DeepSeek	**DeepSeek V4.1 Flash**	Sep 10, 2026	Not published	**Peak: $0.30 / $1.20** Off-peak: $0.15 / $0.60	1M tokens (384K max output)	Open-weight MoE (MIT license). Text and image in. Also replaces the retired V4 Pro.	Lowest-cost strong option for high-volume coding, search and agent workloads. Schedule batch jobs off-peak, or self-host.
Alibaba (Qwen)	**Qwen3.8-Max**	Aug 3, 2026 (preview Jul 19)	Not published	**$2 / $6** Flat across the full 1M window	1M tokens	Open-weight MoE (2.4T total, 95B active). Text, image and video in.	Frontier-class reasoning and agentic coding with flat long-context pricing. Strong for multilingual (especially Chinese) work and Alibaba Cloud deployments.
Alibaba (Qwen)	**Qwen3.8-27B**	Aug 14, 2026	Not published	**Free weights (Apache 2.0)** Self-host	262K native (up to 1M with YaRN)	Open-weight dense 27B model. Text, image and video in.	Local or single-GPU deployment, fine-tuning, and privacy-sensitive workloads where data cannot leave your servers.
Moonshot AI	**Kimi K3**	Jul 16, 2026 (weights Jul 27)	Not published	**$3 / $15** Cached input: $0.30 Flat across the full window	1,048,576 tokens	Open-weight MoE (2.8T total, Modified MIT). Text, image and video in.	Long-horizon agentic software engineering, research and browsing agents, and whole-repository analysis where flat long-context pricing helps.
Mistral AI	**Mistral Large 4**	Oct 6, 2026 (preview). Weights Oct 29, 2026	Not published	**$1.36 / $4.18** Cached input: $0.14	1M tokens (per Mistral docs)	Open-weight MoE (about 1T total, 49B active). Text and image in.	European or sovereign deployments, multimodal enterprise agents and coding where data residency matters.
Mistral AI	**Mistral Medium 3.5**	Apr 28, 2026	Not published	**$1.50 / $7.50**	256K tokens	Open-weight dense 128B model (modified MIT). Text and image in.	A mid-size, self-hostable model that covers chat, reasoning and coding in one set of weights, with European hosting.

Model Provider	Model	Release Date	Cut off Date	Cost of tokens (USD per 1M, input / output)	Context Window	Type	When to use this model
Z.ai (Zhipu)	**GLM-5.3**	Aug 14, 2026 (weights Aug 28)	Not published	**$1.40 / $4.40** Cache read: $0.26	1M tokens (128K max output)	Open-weight MoE (753B total, 40B active). Text only. Custom GLM-5.3 license.	Cost-effective agentic coding and defensive security work, with the option to self-host.

2. Quick guide: which model to pick

If you need...	Consider
Hardest problems, quality first	Claude Fable 5.2, GPT-6 Astra, Gemini 4 Argon, Claude Opus 5.5
Everyday coding and agents (balanced cost and quality)	Claude Sonnet 5.5, GPT-6.1 Sol, Gemini 3.6 Flash, Grok 4.7
High volume at the lowest cost	GPT-6 Luna, Claude Haiku 5.5, Gemini 3.5 Flash-Lite, DeepSeek V4.1 Flash
Computer use and screen automation	GPT-6.1 Terra, GPT-6 Astra, Claude Opus 5.5
Open weights to self-host or fine-tune	Kimi K3, Qwen3.8-Max, GLM-5.3, Muse Spark Open, Mistral Large 4, DeepSeek V4.1 Flash
Small model for local or single-GPU use	Qwen3.8-27B
Real-time web and social (X) data	Grok 4.7
Very long single outputs (hundreds of thousands of tokens)	Gemini 4 Argon
European data residency	Mistral Large 4, Mistral Medium 3.5
Heavy long-context use without surcharges	Kimi K3, Qwen3.8-Max (flat pricing across the window)

3. Notes and assumptions

- Prices are standard API list prices in US dollars per 1 million tokens (input / output), as published around 11 November 2026. Batch, off-peak, cached-input and long-context rates differ, and output prices usually include reasoning (thinking) tokens.
- "Cut off Date" is the provider's stated knowledge (training data) cutoff. "Not published" means the provider has not stated one.
- "Release Date" is the first public availability of the model. Where a preview, general availability or open-weights date differs, both are shown.
- Restricted-access models were left out of the main table: Claude Mythos 5.2 (vetted organisations only), Gemini 4 Carbon (cyber defenders only, announced Oct 28, 2026) and Gemini 3.5 Flash Cyber.
- Not included because they are retired or not yet shipped: DeepSeek V4 Pro (retired Sep 14, 2026, traffic routed to V4.1 Flash), Gemini 3.5 Pro (announced May 2026, no general release found) and Qwen 4 (previewed Sep 22, 2026 without specs, no release found by the research date).
- Model pricing changes often. Gemini 4 Argon's price doubles on Dec 1, 2026. Check the provider's pricing page before committing to a cost estimate.
